

All purpose LED - halogen replacement

This really is a first for LED lightbulbs - unlike all our other LED lamps these are constructed using 24 surface mounted diodes - in simple terms this means it looks like a standard lightbulb with an opaque front and gives a off a light approx equivalent to a 35w halogen but with a very wide (80degree) beam spread. This makes it perfect for general purpose lighting such as in a kitchen or lounge however it's not so good if you want to concentrate light into a particular space.

Available in 2 colour temperatures—Amber White (3200k) or Cold White (6000k)

As with all LED's these require NO warm up time and can be used to directly replace existing Halogen lamps but as they consume just 2.8w power they will save a fortune in the long run.

"A" rated for energy efficiency

RRP £15.31 ex vat

Lumens	110
Colour Temperature	3500 or 6000k
Life Rating	40000 hours
Size	50mm diameter * 63mm long
Wattage	2.3w
Running costs	<1p/day

Product code GU10	LED-GU10-24SMD-WW
MR16	LED-GU10-24SMD-CWWW
