

Maxilux Ultra 7.5w MR16

Specifications

	Dimmable	No
	Power Consumption	7.5w
	Lamp Life	> 40000 hours
	Colour Temperature	2700K
	Beam Angle	30°
	Lumens	350lm
	Size	50mm * 70mm

Description

Built around the revolutionary Sharp 6.7w Mini Zenigata LED, this lamp offers a fantastic light output with a 30° beam angle meaning it's perfect for general lighting without shadowing.

You can replace existing 35w halogen lamps with these units without losing light output. The LED itself is flat and the housing features a high grade optical lens which gives an even dispersal over 45°, almost identical to a halogen lamp.

To keep things simple the electronics inside the Maxilux Ultra are SPECIFICALLY designed to take the 'dirty' signal from a standard transformer and 'clean' it into the constant current supply required for the LED. The result is a lamp you can plug into your existing set-up and reasonably expect it to operate normally without compromising the long term reliability.

The Maxilux Ultra MR16 includes a **3 year warranty** as standard.
